Dear Mr. Burg,

Thank you so much for visiting Collinswood Dual Language Academy. The students learned a lot and they have a better understanding of science in their daily lives. We wish you the best with your future projects in the Charlotte area.

Best wishes!

Gray Donohoe
Collinswood Science Teacher

OCTOBER 22, 2002

Dear Mr. Bury

I thought that the part you said about the freedom park thing was very cool. Also about the kids swimming in the nasty creek water. I would like to participate in the thing at freedom park. Mrs. Donahoe told us about the green way that you would do. I hope that you can visit Collinswood again.

Sincerely,
Christian S.

Dear Mr. Burg

I really enjoyed your class it was really interesting. The part that interest me the most was the part when you told us how important it was to keep the streams weavy. The reason it interests me is because I'm really interested in things that can really help our investment. IF you have a chance to write us back could you please send us some information that tells us how we can keep our investment safe. Also if you could get us more information on how our investment straighter streams. IF you can tell us some oth ways we damage streams and how we can help.

P.S. send us information

Thank you
Paola

Dear Mr. Burg,

Hello! My name is Karime Zabivar. I don't think you remember me but I am writing to tell you thank you for explaining to us about your plans and about your plans and about how man straighten streams.

I really enjoyed your company and explaining to us all different kinds of stuff like Freedom Park, your plans, fertilizer and alot of different stuff.

Mrs. Donohoe told us about what you told her about Building a Rain Garden instead of parking lots. Also about adopting a stream.

We all enjoyed learning from you about streams. It was fun to guess how many streams there were. Then finally someone got it right 32 and got a frog pen.

Thank you for taking time out of your work and

Charlotte NC, October 22 2002

Dear Mr. Burg,

I enjoyed your visit. The part that interested me the most was when you showed us your new plans to unstraighten the streams and plans you already had for Briar creek and Little Sugar Creek. I got really interested when you gave us the pamphlet full of info it made me understand more. Thanks for coming, I had a great time.

Sincerely,
Edson Benitez

P.S. Thanks for the pens.

Tuesday, October 22, Charlotte, N.C.

Dear Mr. Burg,

I thank you for coming and sharing that information about creeks with us. I especially liked the part about a long time ago, people would stratter up creeks. I also liked the part about how I know you are unstraitning the creeks. It really helps the fishes and I'm am grateful that you are doing. Keep up the good work and don't stop helping the wildlife in the creeks.

Sincerely,

Luis Velasco

Dear Mr. Burg,

Thankyou for coming to the school.
I learned alot. I liked the part of the
fertilizer. I didn't know that it could
damage fish and swimming animals.
I also didn't know that man could
straighten rivers or that there was 32
rivers in Mecklenburg County.

Sincerely,
Paul Castanet

Charlotte, Oct 23 2002

Dear, Mr Burg

Thank you for showing us all the information about erosion I really liked the part when you made us guess how many creeks there are in Mecklenburg County and thank you for taking your time to teach us thank you and I hope you enjoyed your visit at Collinswood

Sincerely,

Alan Valdez

Dear Mr. Burg,

I really enjoyed your Class it was Fun, the part I really enjoyed was when how the men straighten the streams and its very interesting. You told us that sometimes it is very bad to straighting up the streams because it could flood when it rains very hard when I grow up I would like to work just like you do. I guess it would be so Fun. Thank you For coming to Collinswood.

Sincerely,

Itzell Trejo

Dear Mr. Burg

Hello I am Danna Carrillo (the person you gave the pen to) I'm just writing to say thank you for coming to are school I hope you enjoyed your self.

I was really interested in what you said about how man affects the animals in streams and in rivers.

Mrs. Donchoe told us about the *Adopt a Stream Project* and the *Build a Rain Garden Project* can you please send me more information about were to go.

Well as I said before thank you for coming you really got me and my classmates interested in the topic.

Your interested friend,
Danna Carrillo

Dear Mr Brug,

I wanted to send you a letter because I really was intited when you came to the libearny. The pictures were nice. I'm going to learn more about creeks. Ms. Donohoe told the class that we can get on line. I will go outside by the creek in my nagbiorhood.

I'm going to find tapoes there and turtles swimming in dirty water. Also little Shimps stay under water. I don't know that much about a creek because my mom told me it is for the rain. For the houses would not flud. There is a lot of things that don't belong inside of there.

Dear Mr. Burg,

My favorite part of your discussion was when you talked about how the fertilizer can affect the animals. I liked when you dug the hole near Freedom park.

Sincerely
Ismael .C.

October 23, 2022

Dear Mr. P...
The day was the best about
for the first time with
the best of them. I'll
thank you for teaching and
love again.
